Pin Assignment

Contact	Function	-A1 voltage type	-F1 Current type	
Α	Dawes Consoli	DC24V(19-35V)		
В	Power Supply	0V		
D	Differential amplifier input	\pm 10V(Re>50K Ω)	4-20mA(Re<200Ω)	
Е	(command value)	Reference Potential command value		
F	Magazing output (actual value)	±10V(IL<2mA)	4-20mA(RL<200Ω)	
С	Measuring output (actual value)	Reference Potential actual value		
PE	Earthing	Connected to the valve side cover and housing		

Command value:

Positive command value (0...10 V or 12...20 mA) at D and reference potential at E result in flow from P \to A and B \to T

Negative command value (0...-10 V or 12...4 mA) at D and reference potential at E result in flow from P \rightarrow B and A \rightarrow T

Actual Value:

Actual value 0 ... +10 V (or 12 ... 20 mA) at F and reference potential at C result in flow from P \rightarrow A and B \rightarrow T.

Actual value 0 ... –10 V (or 12 ... 4 mA) result in flow from P \rightarrow B and A \rightarrow T.

Notice: Electrical signals provided via control electronics (e. g. actual value) must not be used for switching off safety-relevant machine functions.
